

Template

Please use the following template for creating your project report.

Project name	Xcelerator Demo Application
Project mission	The mission of this project is to develop an application streamlining the monitoring and management of facilities, allowing managers to rapidly identify and address issues such as faulty pumps or tanks. Moreover, they will have access to comprehensive data on their assets, enabling them to make data-driven decisions about repairs, replacements, and upgrades. In addition, we aim to showcase how to employ the Siemens Xcelerator ecosystem to monitor and manage multiple facilities, highlighting key features such as real-time data integration, predictive maintenance, and streamlined operations.
Industry partner	Igor Milovanovic - Siemens AG
Team logo	
Project summary	The Xcelerator Demo Application is designed to streamline the tasks of facility managers. It provides a user-friendly interface to monitor facility conditions, report issues, and track the resolution process effectively.
